### **Airguide Altimeter - HPD Collaborative**

To calibrate your (barometric) Altimeter to QNH, either auto-calibrate from the GPS at Take Off or input the local pressure from a weather chart etc. If you are flying near high level airspace defined by FL (Flight Level) and the pressure is above 1013mb just use your calibrated (barometric) Altimeter set to QNH and you will have “extra” clearance to the airspace.

### **Sun Altimeter/Barometer Tutorial - YouTube**

Altimeters measure height above particular pressure levels. To do this, they compare the pressure of outside static air to the standard pressure of 29.92" Hg of air at sea level. Air is denser at sea level than aloft, so pressure decreases as altitude increases (and vice versa).
