### **What is a Dichotomous Key | Step-by-Step Guide with**

A dichotomous key is a very useful tool. It helps you identify unknown organisms by using a system that breaks down the characteristics of a set of organisms into TWO groups over and over again until you only have one organism in a group (Di = two and you only have two choices at each splitting of groups). Building a dichotomous key is not as hard as you might think it would be. All it takes is a bit of concentration.
