Piling is a fast moving field and recent years have seen major advances in theory, methods, testing procedures and equipment. Some of these changes have been driven by the need for economies and efficiency, reduced spoil production and new methods of pile bore support. Advances in theoretical analyses allow pile design to be refined so that piles and pile groups perform to better advantage.

Bing: Fleming In Piling Engineering

Ken Fleming created the "Cemset" system which forecasts pile settlement under load. He became chairman of the Federation of Piling Contractors, and in 1975 chairman and founder member of the Federation of Piling Specialists. In 1985 he was the lead author of Piling Engineering, which has become
