Shutter Speed. When capturing video, shutter speed is the amount of time that each individual frame is exposed for. In video, this is typically a fraction of a second, like 1/48 sec or 1/60 sec. Film motion picture cameras use a rotary disc shutter to achieve their exposure times, with shutter speed indicated as a shutter angle.

## **Understanding Shutter Speed: Creative Action and Low-Light**

Shutter speed is the length of time your camera shutter remains open to let the light come in, hit the camera sensor to record the image. The shutter will fire immediately when you press the shutter button (or shutter release) and will close immediately after the sensor has collected the light.. It is also called exposure time and it's measured in seconds or fractions of it.

## **Understanding Shutter Speed: Creative Action and Low-Light**

Shutter speed is the length of time camera shutter is open, exposing light onto the camera sensor. Essentially, it's how long your camera spends taking a photo. This has a few important effects in how your images will appear. When you use a long shutter speed, you end up exposing your sensor for a significant period of time.
